

Isolation Valves

Factory Tested For Leaks Mounted
Between Pumps & Receiver Tank

Efficiency:

- Eliminate wasting large amounts of condensate.
- Save time and money on maintenance.

Easy to Use:

- Replacement of pump seals made easy.
- Stop pins to ensure closure.
- Flow indicated by handle direction.

Adaptability:

- Can be adapted to pumps of most major manufacturers.
- Used only on vented atmospheric units.

High Quality Construction:

- All bronze construction.
- "O" Ring in housing allows for thermal expansion.

Safety:

- For lock out/tag out, a blind flange/gasket must be installed after valve.
